INSTALLATION

Server : Delta SE

To install "Delta SE" server, just extract "ReleasePackage.zip" to server machine.

Server root folder: "...\\ReleasePackage\\Server_Delta_SE"

Client : Delta

To install "Delta" client, just extract "ReleasePackage.zip" to client machine.

Client root folder "...\\ReleasePackage\\Client_Delta"

- **Configuration:**

After extract to client machine, to connect client to server, user must configure client settings.

From root folder of client, enter server's IP in to tag <value> in file "**Project Delta.exe.config**":

```
...  
  <Project_Delta.Server>  
    <setting name="ServerDeltaSE" serializeAs="String">  
      <value>192.168.1.92</value>  
    </setting>  
  </Project_Delta.Server>  
...
```

USING SERVER

Start server

To start server, run "**Project Delta SE.exe**"

Create an account manually:

Admin of this server can create an account manually by edit file "**Credentials.json**".

The schema of Credentials.json file as below:

```
{ "Credentials": [
  { "username": "<username 01>", "password": "<password 01>" },
  { "username": "<username 02>", "password": "<password 02>" },
  { "username": "<username 03>", "password": "<password 03>" },
  ... <Create new account here> ...
]}
```

To create new account,

Add this line to list of credentials :

```
{ "username": "<new_username>", "password": "<new_password>" },
```

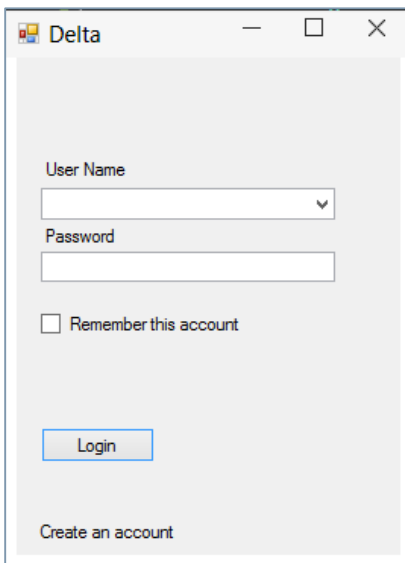

USING CLIENT

Start client

To start client, run "**Project Delta.exe**"

Create an account

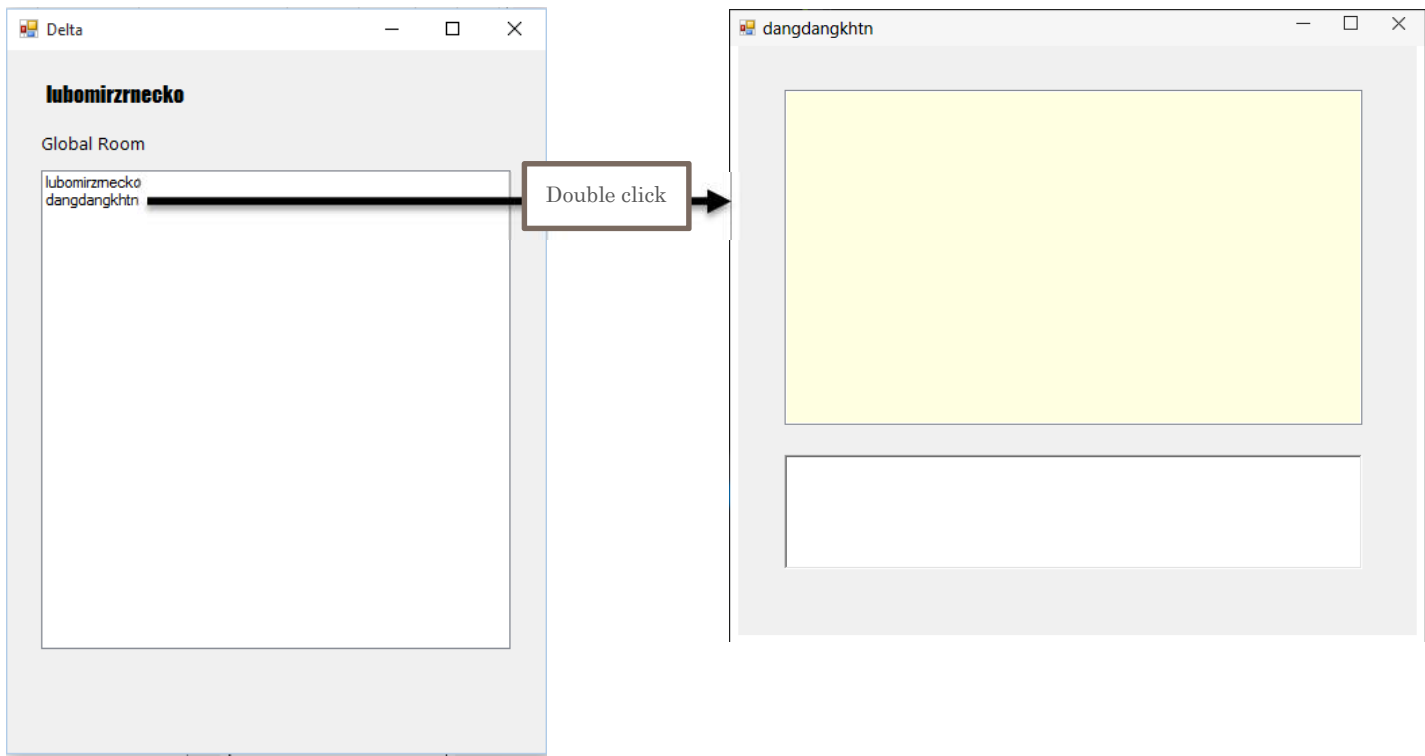

Register account on server. Click to "Create an account".

The image shows a Windows-style application window titled "Delta". Inside the window, there is a "User Name" label above a text input field with a dropdown arrow on the right. Below that is a "Password" label above another text input field. Under the password field is a checkbox labeled "Remember this account". At the bottom left of the window is a "Login" button. At the bottom right, below the login button, is a link that says "Create an account".

Join to Global Room

Server provide a chat room called Global Room. When users login, that means users join to Global Room.

After joined to Global Room, user can user button "Refresh" to update list of users are joining.

Chat with another users:

User can establish a chatting session with another users, just double click on the name of the user who want to chat with.

In the same time, a user can chat with many different users.
